Size Charts

Since the 1980s, we have developed, refined, and worked tirelessly to design the best signage concepts in the industry for customers both domestically and internationally.

To ensure you receive the perfect solution, we guide you from start to finish, working together to find the option that matches your needs and budget.

Quality, design, and durability are our top priorities, and you will be met with experienced and skilled professionals throughout every stage of consultation, design, production, and installation.

As a full-service provider in our field, our expertise and guidance ensure you receive the ideal solution tailored specifically for you.

We take pride in our longevity and the journey we've been on, guaranteeing that the traditions and experience we've built over the past four decades are reflected in every project we undertake, serving as an enduring stamp of quality on our work.

We are professional sign technicians, project managers, graphic designers, and installers with more than 40 years of experience in the industry.

Let us help you guide the way forward.

Back in the 1980s
PlanSign first saw
the light of day.

Since then, it has become a permanent part of our signage collection. Its timeless and minimalist design blends seamlessly into any environment – including the future.

In 2004, PlanSign was honored with the IF Design Award – an internationally recognized design award.

The design and flexibility make the system ideal for large building complexes such as hospitals, universities, corporate headquarters, and schools.

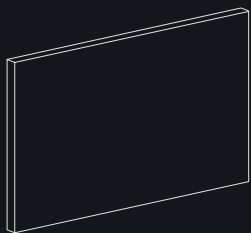

The signs are crafted from 5 mm aluminum, with "soft" beveled edges and a matte, almost silver-satin finish that lends an exclusive look. The sign is flat and mounted 5 mm from the wall. Additionally, it features a built-in magnetic lock system, ensuring only authorized personnel can remove or modify the signs.

The choice of materials makes the system suitable for both indoor and outdoor use, resistant to scratches and dirt.

PlanSign offers countless combinations and can be lacquered in any desired color. The signs can also be decorated with vinyl lettering, logos, graphics, or engraved text/logos for both indoor and outdoor installation.

PlanSign, anodized

Panel Signs with Text Tracks

Includes a signfront, 3 mm clear acrylic protective screen, mounting profile, and locking spring.

Panel signs with text tracks can be mounted individually, on mounting profiles for signboards, or on wing profiles.

A concealed locking screw behind the panel prevents unauthorized access to the inserted print (with the exception for the 120 mm size).
