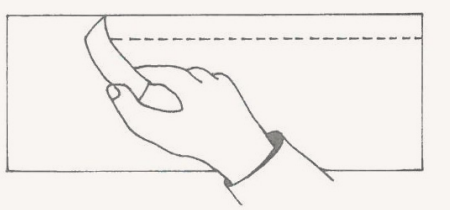
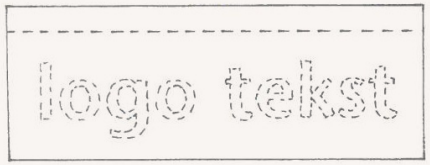
3M Installation Guide

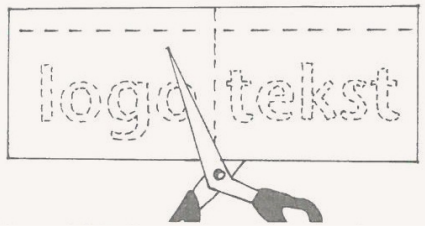
Step-for-step



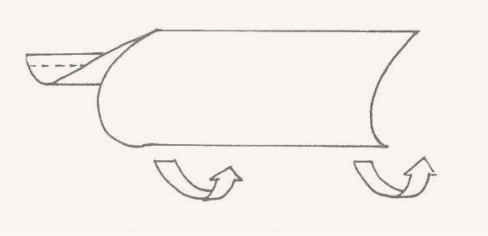
1.
Ensure the surface is clean, then peel off the top strip of the backing paper.



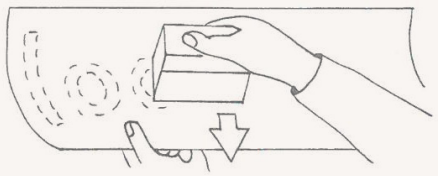
2.
Position the text/logo at the desired location. Repositioning is possible before removing the rest of the backing paper.



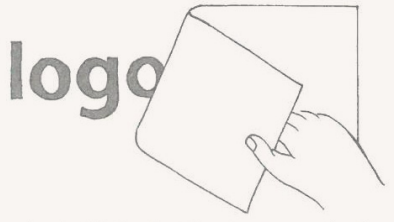
3.
For long texts/logos, you may cut them into smaller sections after positioning.



4.
Lift the text/logo up and remove the remaining backing paper.



5.
Press the text/logo firmly with the scraper. Start from the top and hold the rest of the text/logo away from the surface as you work.



6.
Remove the white protective tape and check that all edges are firmly pressed down.
